

## Bar Chart Activity Sheet

### “Fred’s Pockets”

Stan was so dismayed by the amount of things his younger brother Fred turned out of his pockets, he had to draw up a bar chart, then have a big lie down. Can you help him answer the following?

1. Fred has eaten most of the smarties - only six are left. What total number of items has he got now?
2. How many fewer Sticks are there than Snotty Tissues?
3. Fred started collecting snails on Monday. By Friday he has managed to accumulate 30 snails. On average, how many snails is he pocketing per day?
4. How many invertebrates did Fred put in his pockets?

5. What's in your pockets? Or at the bottom of your school bag? Fill in your own bar chart. You could even do a Whole Class Bar Chart and find out what the most popular item is to put in a pocket.
